

Structural Concepts, Inc. acting as Engineer of Record prepared structural design and calculations and provided direction for the construction of the building structure.

The 60,000 square feet two story church building includes a 10,000 square feet sanctuary which houses 1,100 worshipers. The 3,200 square feet Youth Chapel will accommodate 150 worshipers. The building also includes a 6,000 square feet gymnasium/auditorium, an impressive two story 1,350 square feet entry area, and multiple classrooms and offices.
